

Who we are?

We are a group of people who come together while using, accompanying or providing mental health services.

According to us, each person with disabilities or differences may exist with their own choices in economical and social life.

IYI Social Cooperative Initiative puts emphasis on lived experiences and individual differences, focuses on the abilities not the inabilities. Our intention is to come together just as a 'human being' without the roles and labels while talking about our experiences.

IYI Social Cooperative Initiative
